Unlocking HUNK in Raid mode is an arduous task, as it requires beating all of the most challenging stages with the best possible rank. This DLC offers kind of a shortcut by adding his only alternate costume, a female version.

Of course, Lady HUNK is not just a skin: she is a standard character. She also has the highest possible rank in magnum mastery, meaning she fires and reloads every gun in this powerful weapon category faster than most characters can wield their standard handguns. While all her other (hidden) stats are average at best, making her a one-trick pony, the power of the magnums makes that one helluva trick.

Lady HUNK often becomes the main character for the owners of this DLC, especially on higher levels. While she is balanced enough to not fall into the pay-to-win category, this popularity alone should be enough to show how great an investment she can be for raid players.. Change the voices to Japanese, thank me later. Capcom is a POS company which abandons its broken games after launch.. Buy if you like big boopis.

7V10 character

7.2V10 boopis. Some people have a strange habit to genderbend characters from games or movies. Strange, awkward but for the sake of God how awesome.

This time Capcom relased a DLC for one of best Resident Evil games allowing to play as genderbended version of glorious HUNK, as he is very hard to unlock normally his female counterpart is a nice alternative. Her animations are very similar to ones from Jill and the voice clips borrowed from Rachel but with gas mask effect.

Lady HUNK is a must have DLC for fans but is kind of a lazy addition just to get your money. Still, she is worth paying if on sale. 8V10.

i ask you i bought a lady hunk dlc when i did not game???. Worth it. Why bother unlocking HUNK when you could buy his female loli counterpart?. Her model is nice and detailed, but animation of kicking should be more flashy\brutal :) Lady HUNK has abilities connected only with Magnum Pistols, so if you don't use them, you don't really need her :V Buy only on sale and only if:

a) You play a lot on Raid Mode

b) You are a big fan of HUNK

c) You really like Magnum Pistols (+100% Reload Speed and +70% Firing Rate). Since HUNK himself is absurdly difficult to unlock in the game, a Lady HUNK will do *just fine*. *Worth it!* *Lady HUNK is a qt.. The classic oldest profession at work here. Female skin of classic bonus character = You now pay money for their company because female.*

If I see a player online using this skin it's depressing knowing it's a DLC exclusive. If I see a player using the classic Hunk skin I know that player is dedicated to the game. Unlocking Hunk is a badge of honor in this game. I don't have him yet. DO NOT WANT an instant unlock DLC either. I have a reason to keep playing knowing that Hunk will be extremely tough to acquire. If you can just buy everything with real money what's the point of the game experience in the first place?

I got this DLC included in the less than \$10 Steam winter sale complete edition. It's complete nonsense to expect players to pay extra for skins. Skins should be earned.

I advise using the FREEWARE FOV slider mod with this one. No one will charge you money to oogle at Lady Hunk's legs with FOV slider. Why isn't a FOV slider in the game instead of all these minimal effort\high profit DLCs?
